

Clean Fuel for Mobile Space Heaters

Firelux Plus is a reliable, clean fuel containing low levels of aromatic hydrocarbons. It is ideal and convenient for use with all makes of mobile paraffin heater.

Pure fuel for clean combustion

Firelux Plus contains extremely pure, highly refined petroleum distillates and is a very clean fuel for mobile paraffin heaters. This space heater fuel burns more cleanly than other fuels by virtue of the absence of many hazardous substances, resulting in reduced odour levels when igniting and extinguishing the heater. Wear and tear on the wick and burner are also reduced lengthening the space heater's working lifetime.

Firelux Plus - Advantages

All makes of mobile space heater work extremely well using Firelux Plus fuel. It complies with all European space heater manufacturers' warranty terms, as well as stringent European legislation, e.g. French NF128 (25-06-2010) standards.

In short:

- Suitable for use with all makes of mobile space heater
- Virtually sulphur-free
- Low aromatic hydrocarbon content and reduced odour levels when igniting and extinguishing heater
- Clean fuel, reduced emission levels of hazardous substances guaranteeing a longer working lifetime for your heater
- High flash point (above 62 °C), and therefore not subject to ADR (International Carriage of Dangerous Goods by Road) regulations
- Packaged in 100% recyclable, HDPE containers with Firelux Plus child-safe caps

Firelux Clear is also available in addition to Firelux Plus. Please enquire with your Firelux retailer or visit the www.firelux.nl website.
