

Firelux Clear

GTL Synthetic Fuel for Mobile Space Heaters

Firelux Clear is a reliable, odourless GTL fuel for use with mobile space heaters. It produces reduced emission levels of hazardous substances and contains extremely low levels of aromatic hydrocarbons.

GTL Synthetic Fuels (Iso-Paraffins)

GTL stands for 'gas to liquids'. They are synthetic fuels produced from natural gas using the Fischer-Tropsch process. An important property of GTL fuels is their purity. They are 100% desulphurised and dearomatised, yet still have a high cetane number guaranteeing high-grade combustion. GTL fuels are generally viewed as forming an important step towards making fuels more sustainable.

Firelux Clear - Advantages

All makes of mobile space heater work extremely well using Firelux Clear. It complies with all European space heater manufacturers' warranty terms, as well as stringent European legislation, e.g. French NF128 (25-06-2010) standards.

In short:

- Suitable for use with all makes of mobile space heater
- Contains no sulphur or sulphur-based compounds
- Odourless and extremely low aromatic hydrocarbon content
- High cetane no. for optimal combustion quality and reduced emission levels of hazardous substances
- Biodegradable and high flash point (above 62 °C), i.e. not subject to ADR (International Carriage of Dangerous Goods by Road) regulations
- Produced using sustainable gas to liquid processes
- Packaged in 100% recyclable, HDPE containers with child-safe caps

Firelux Plus is also available in addition to Firelux Clear. Please enquire with your Firelux retailer or visit the www.firelux.nl website.
